2015 Washington State Energy Code Development Energy Code Proposal Short Form

For editorial **Coordination, Clarifications & Corrections** only,
without substantive energy or cost impacts

May 2018

Log No. 21-GP3-024

Code being amended: ☒ [Commercial](#) Provisions ☐ [Residential](#) Provisions
(A MS Word version of the code is linked to the name)

Code Section # Table – C406.1

Brief Description:

Credits must be recalibrated for new baseline minimums for electric resistance and gas fired appliance options per EPCA preemption regulations, pending outcomes of other approved proposals in this off-cycle rule process.

Proposed code change text: (Copy the existing text from the Integrated Draft, linked above, and then use underline for new text and ~~strikeout~~ for text to be deleted.)

The type, and extent of “recalibration” to this table will be dependent upon other code change proposals accepted.

Purpose of code change:

Changes to the credit-weights in this table will likely be required as new baselines will be established for additional appliance options that are covered under EPCA preemption.
